### Replisaurus wins IC Industry 2008 Cleantech award

During an awards ceremony at the Semicon Europe show the winners of the IC Industry 2008 awards were announced. Replisaurus was presented with the 2008 Cleantech award for its environmentally sound and highly efficient ECPR metallization technology.

With the introduction of the ECPR metallization process Replisaurus offers IC manufacturers to remove all toxic photopolymers, developers and strippers from the manufacturing flow, and significantly reduce the consumption of electrolytes and rinse water.
